

GEOSOPHY L.t.d Engineering & Consulting Company
manufactures high quality monitoring targets, prisms & target foils.

We are interested in finding distributors of our products.

“ **Moniterra - target** “ is an **innovative system** designed upon our long experience in deformation monitoring. All products are made from high impact and resistant materials for use in any environmental conditions.

Our *monitoring targets & prisms* can be applied in **tunnels, dams, bridges, monuments, structures, buildings, slopes and landslides**

High Quality, Low Distribution Prices, Strong Market Value and **Reliability**, can be considered as a motivation for the potential distributor. Upon request we can send you samples, a proposed distribution price list and more detailed information about our products.

Please do not hesitate to contact us for any clarification/information.

Kind regards,
